Child Abuse * Emotional Abuse * Mental Abuse * Verbal Abuse * Domestic Violence * Physical Abuse

Research evidence based practices: In compliance with IC 35-50-9-1, our program is an Indiana Coalition Against Domestic Violence (ICADV) Certified Batterers Intervention Program. Using the latest evidence based curriculum materials, our classes address all types of inappropriate or abusive behavior including: emotional abuse, mental abuse, verbal abuse, substance abuse, and physical abuse. We even cover the lowest levels of hurtful behavior such as “the silent treatment” and “the look”. Our program has been assessed to be an “innovative evidenced based Cognitive Behavioral Therapy (CBT) model” by Monica Solinas-Saunders, PhD, Assistant Professor of Criminal Justice, Indiana University Northwest.

We respect our clients: Court mandated and voluntary clients are accepted and treated equally. Our common sense approach is simple and respects the dignity of our clients.

No mental health diagnosis or label: Our program is education, not treatment. Clients do not receive a mental health diagnosis or label that could stigmatize and cause future harm.

Specialists in Violence & Abuse: We are not a general counseling agency that has quickly thrown together an anger management program on the side. Working to end violence and other abusive behavior is our specialty. It is what we do and we strive to be the best at what we do!

Programs for men and women: We offer programming specifically designed for abusive women as well as programming for abusive men.

No waiting list: All our classes are open ended so new clients can start at any time. We believe that early referral and intervention of abusive behaviors may prevent further abuse.

Low client fees: All of our programs are low cost direct fee for service. No health insurance coverage is required. Our fees are actually less than most health insurance deductibles and co-pays. No insurance or employer benefit programs are required to obtain our services. Based on our current rate schedule, our weekly class fees are only \$25 to \$40. When local courts approve and support our accountability protocols, policies, and procedures, participants are never turned away due to inability to pay. We are also a DCS contract provider listed in KidsTrak as “Terry Moore”.

Convenient Class Schedule: We offer early afternoon to evening class schedules to accommodate most client work schedules.

Assessments: As part of our Orientation, every participant who did not receive a comprehensive assessment prior to referral to our program receives a FREE screening to rule out the need for more intensive intervention for substance abuse and/or mental health issues. We utilize evidence based screening instruments acquired from the U.S. Department of Health and Human Services, Public Health Service, Substance Abuse and Mental Health Services Administration (SAMSHA), Center for Substance Abuse Treatment (CSAT)'s Treatment Improvement Protocols. Thus, an assessment is not prerequisite to enrolling in our program.

Accountable Reporting to Referral Sources: We are experienced in working with criminal justice offenders. We understand accountability is vital when conducting effective forensic intervention. We have developed our own online custom computerized database reporting system. Thus, we take great pride in our impeccable track record of providing timely documentation and reporting. Login to our online client tracking database at <http://www.BIPdatabase.com> and receive up to the minute current Status Reports.
